

CAMERA DRAWING

The vertical monitor and the NVR will be behind the central pillar at the cashier/reception area.

The staff can look at the screen, hidden from the customers' side.

Two cameras (01 and 02) will observe cashiers from the top and survey the reception area from the entrance.

The NVR can be installed at the same pillar under the screen (hidden from the customers' side or inside a cashier cabinet which will be better but not included at this stage).
